

Smooth-leaved Quandong

This native evergreen grows in a narrow upright shape with abundant glossy dark green leaves forming a dense canopy. Providing a vibrant contrast, new leaf growth is a golden orange or deep bronze in colour. In summer, fragrant cream-coloured flowers give way to egg-shaped dark blue berries.

This fast-growing elegant tree is quite narrow relative to its height making it well suited to constrained streetscapes with limited space.

	Botanic name	Elaeocarpus eumundi
	Typical height	10-12 metres
	Typical width	3-5 metres
	Leaf	Glossy dark green, new growth is orange/bronze
	Bark	Grey in colour with corky bumpy irregularities
	Flowers	Cream
	Fruit Pod	Small dark blue berries
