

# Moonlight Grevillea

This fast-growing native shrub is the perfect addition to any domestic garden or streetscape. With its large cream to yellow flowers which bloom almost year-round, there is always something to admire in the 'Moonlight'. This species is low maintenance and can be pruned and shaped for hedges or low growing bushes. Its crown can also be raised and trained into a small tree shape. Grevillea 'Moonlight' enjoys a full-sun to part-shade location, and once established is frost and drought tolerant.

You can see a great example of a Moonlight Grevillea planting at 36 Clackmannan Road, Winston Hills.
