

# Port Wine Magnolia

This vibrant exotic shrub is known for its small flowers which produce a heady fruity scent likened to banana and vintage port. Blooming from Spring to Summer, flowers begin as a deep purple colour and transition to a creamy white. Native to south west China, this species prefers a sunny position and needs a little help with regular watering in dry periods.

You can see a great example of a Port Wine Magnolia planting at 25 Woodberry Road, Winston Hills.

	<b>Botanic name</b>	Michelia figo
	<b>Origin</b>	South-west China
	<b>Typical height</b>	2.5-5m
