

Queensland Firewheel

This tropical gem commonly known as the Queensland Firewheel Tree earns its name from the vibrant orange to red flowers which bloom from late Summer to mid-Autumn. The flowers are arranged in a circular pattern like spokes on a wheel and have an attractive drooping shape growing in abundance to almost conceal the leaf from view. Establishing in 3 to 4 years, this species is slow growing but long-lived.

You can see a great example of a Queensland Firewheel planting at 32 Myrtle Street, Rydalmere.

<i>a</i>	Botanic name	Stenocarpus sinuatus
	Origin	Australia
	Typical height	15-20m
	Typical width	6m
	Foliage Type	Evergreen
	Leaf	Dark glossy green and pointed, oval-like shape
	Bark	Fissured or wrinkled
	Flowers	Red tubular
	Fruit Pod	Brown capsule
